

# RETURN TO CRICKET BLAST CHECKLIST

Current as at 29 June 2020

**THIS CHECKLIST HAS BEEN DEVELOPED TO SUPPORT A RETURN TO CRICKET BLAST UNDER CURRENT SA GOVERNMENT COVID-19 RESTRICTIONS. THE KEY PRINCIPLE FOR THIS RETURN IS 'GET IN, PLAY, GET OUT'.**

## ***Blast Coordinator (COVID Marshal)***

- Ensure that your club has created and implemented a COVID-Safe Plan. These plans can be created here: [www.covid-19.sa.gov.au/recovery/create-a-covid-safe-plan](http://www.covid-19.sa.gov.au/recovery/create-a-covid-safe-plan)
- Responsible for ensuring COVID-Safe protocols are followed and must reiterate critical points to all Blasters and parents during the welcome assembly at each session.
- Required to complete the COVID Marshal training and be able to provide proof if asked while on duty. <https://marshal.clickontraining.com.au>
- Must ensure the regular use of alcohol-based hand sanitizer by coaches, Blasters and parents throughout the session.

## ***Limit sharing of equipment***

- Where possible, Cricket Blasters should bring their own bat to each session, clearly named.
- If a bat must be borrowed, it is recommended that it is not shared between Blasters for the duration of the session.
- Blasters should limit any unnecessary touching of other equipment such as cones - for example, the coordinator is responsible for packing up.

## ***No sharing of food or drinks***

- Each Blaster should bring their own drink bottle, clearly named.

## ***Practice physical distancing***

- All coordinators, coaches, Blasters and parents should understand the need to observe physical distancing of 1.5m where possible.
- No physical contact, including high fives - instead, award bonus points to Blasters for their achievements.

## ***Hygiene protocols are in place***

- It is recommended that any frequently touched equipment is disinfected regularly.
- Ensure bins are easily accessible to allow tissues and other waste to be disposed of quickly.

## ***Cold and flu symptoms***

- If any coordinators, coaches, Blasters or parents are feeling unwell or experiencing symptoms, or if any of their close contacts are feeling unwell or experiencing symptoms, they must stay home.
